

Design Guideline

For Web & APP

#Design Language #Atomic Theory #UI Kits

OVERVIEW

By unifying the project teams under one shared language, a project can move forward with clarity, cohesion and fast innovate.

In this project, we focused on these fields as below list :

- Brand Recall
- Consistency
- Clarity
- Data Visualization

RESPONSIBILITIES

Brand Strategy
Competitor Analysis
Apply Atomic Design Methodology

In this design guideline, we applied atomic theory for maintaining interaction consistency

VISUAL DESIGN LANGUAGE STEPS

RESEARCH

- Branding Embedded
- Competitive Analysis
- UI Audit

DESIGN: Atomic Theory

- Basic Elements & Components Design
- Patterns & Templates Design
- Charts Design

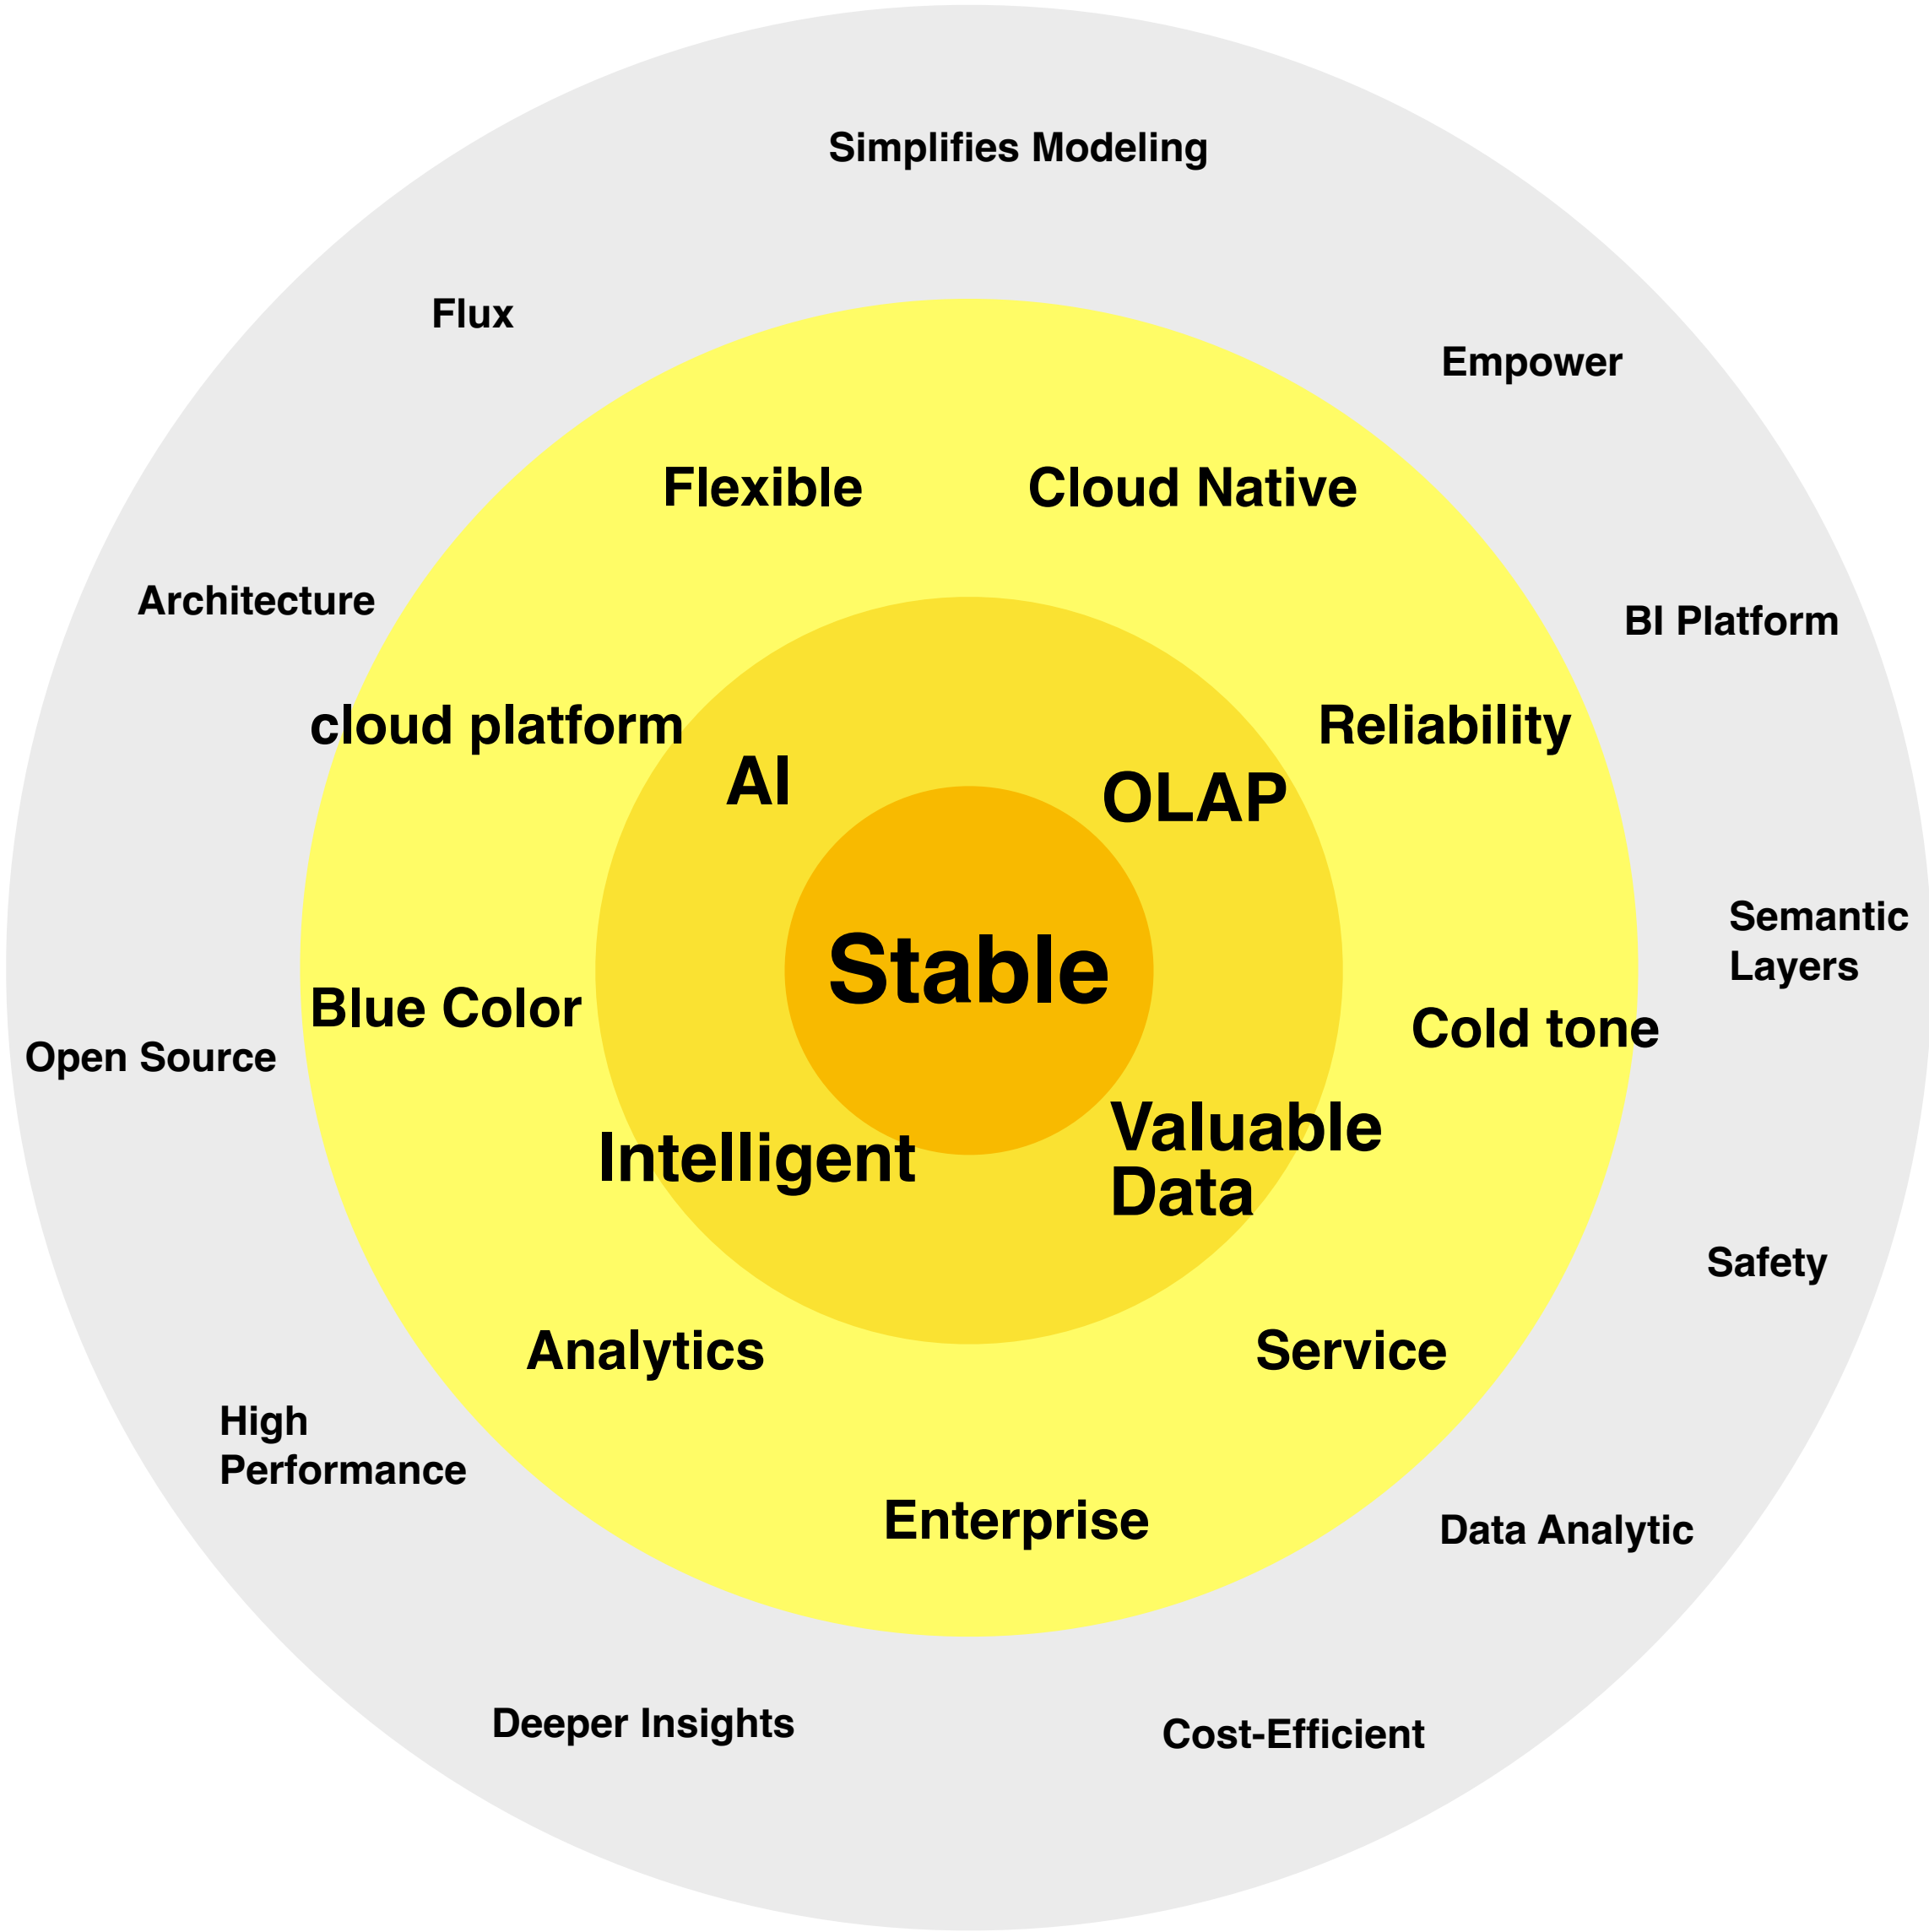

LAUNCH ONLINE

- Style Guides, Pattern Libraries, Design Principles Setting
- UX/UI Review

Understand How Users Perceive The Brand

Creating a strong visual identity is a goal that design teams should state when working on visual design. This is the personality of a digital product! The colors, typefaces, photos, illustrations, animations are all part of a brand, and they should be designed in a way that helps people remember the product. When an authentic design language is followed consistently, it creates recognizability for the brand.

We had interviewed over 20 colleagues, included CEO, CTO, CMO and other key manager. To discuss what are the characteristics and first impressions needed for our enterprise products. We had discussed few keywords and design a tag cloud to visualize the result.

Enterprise Platform Brainstorming: Branding Concept

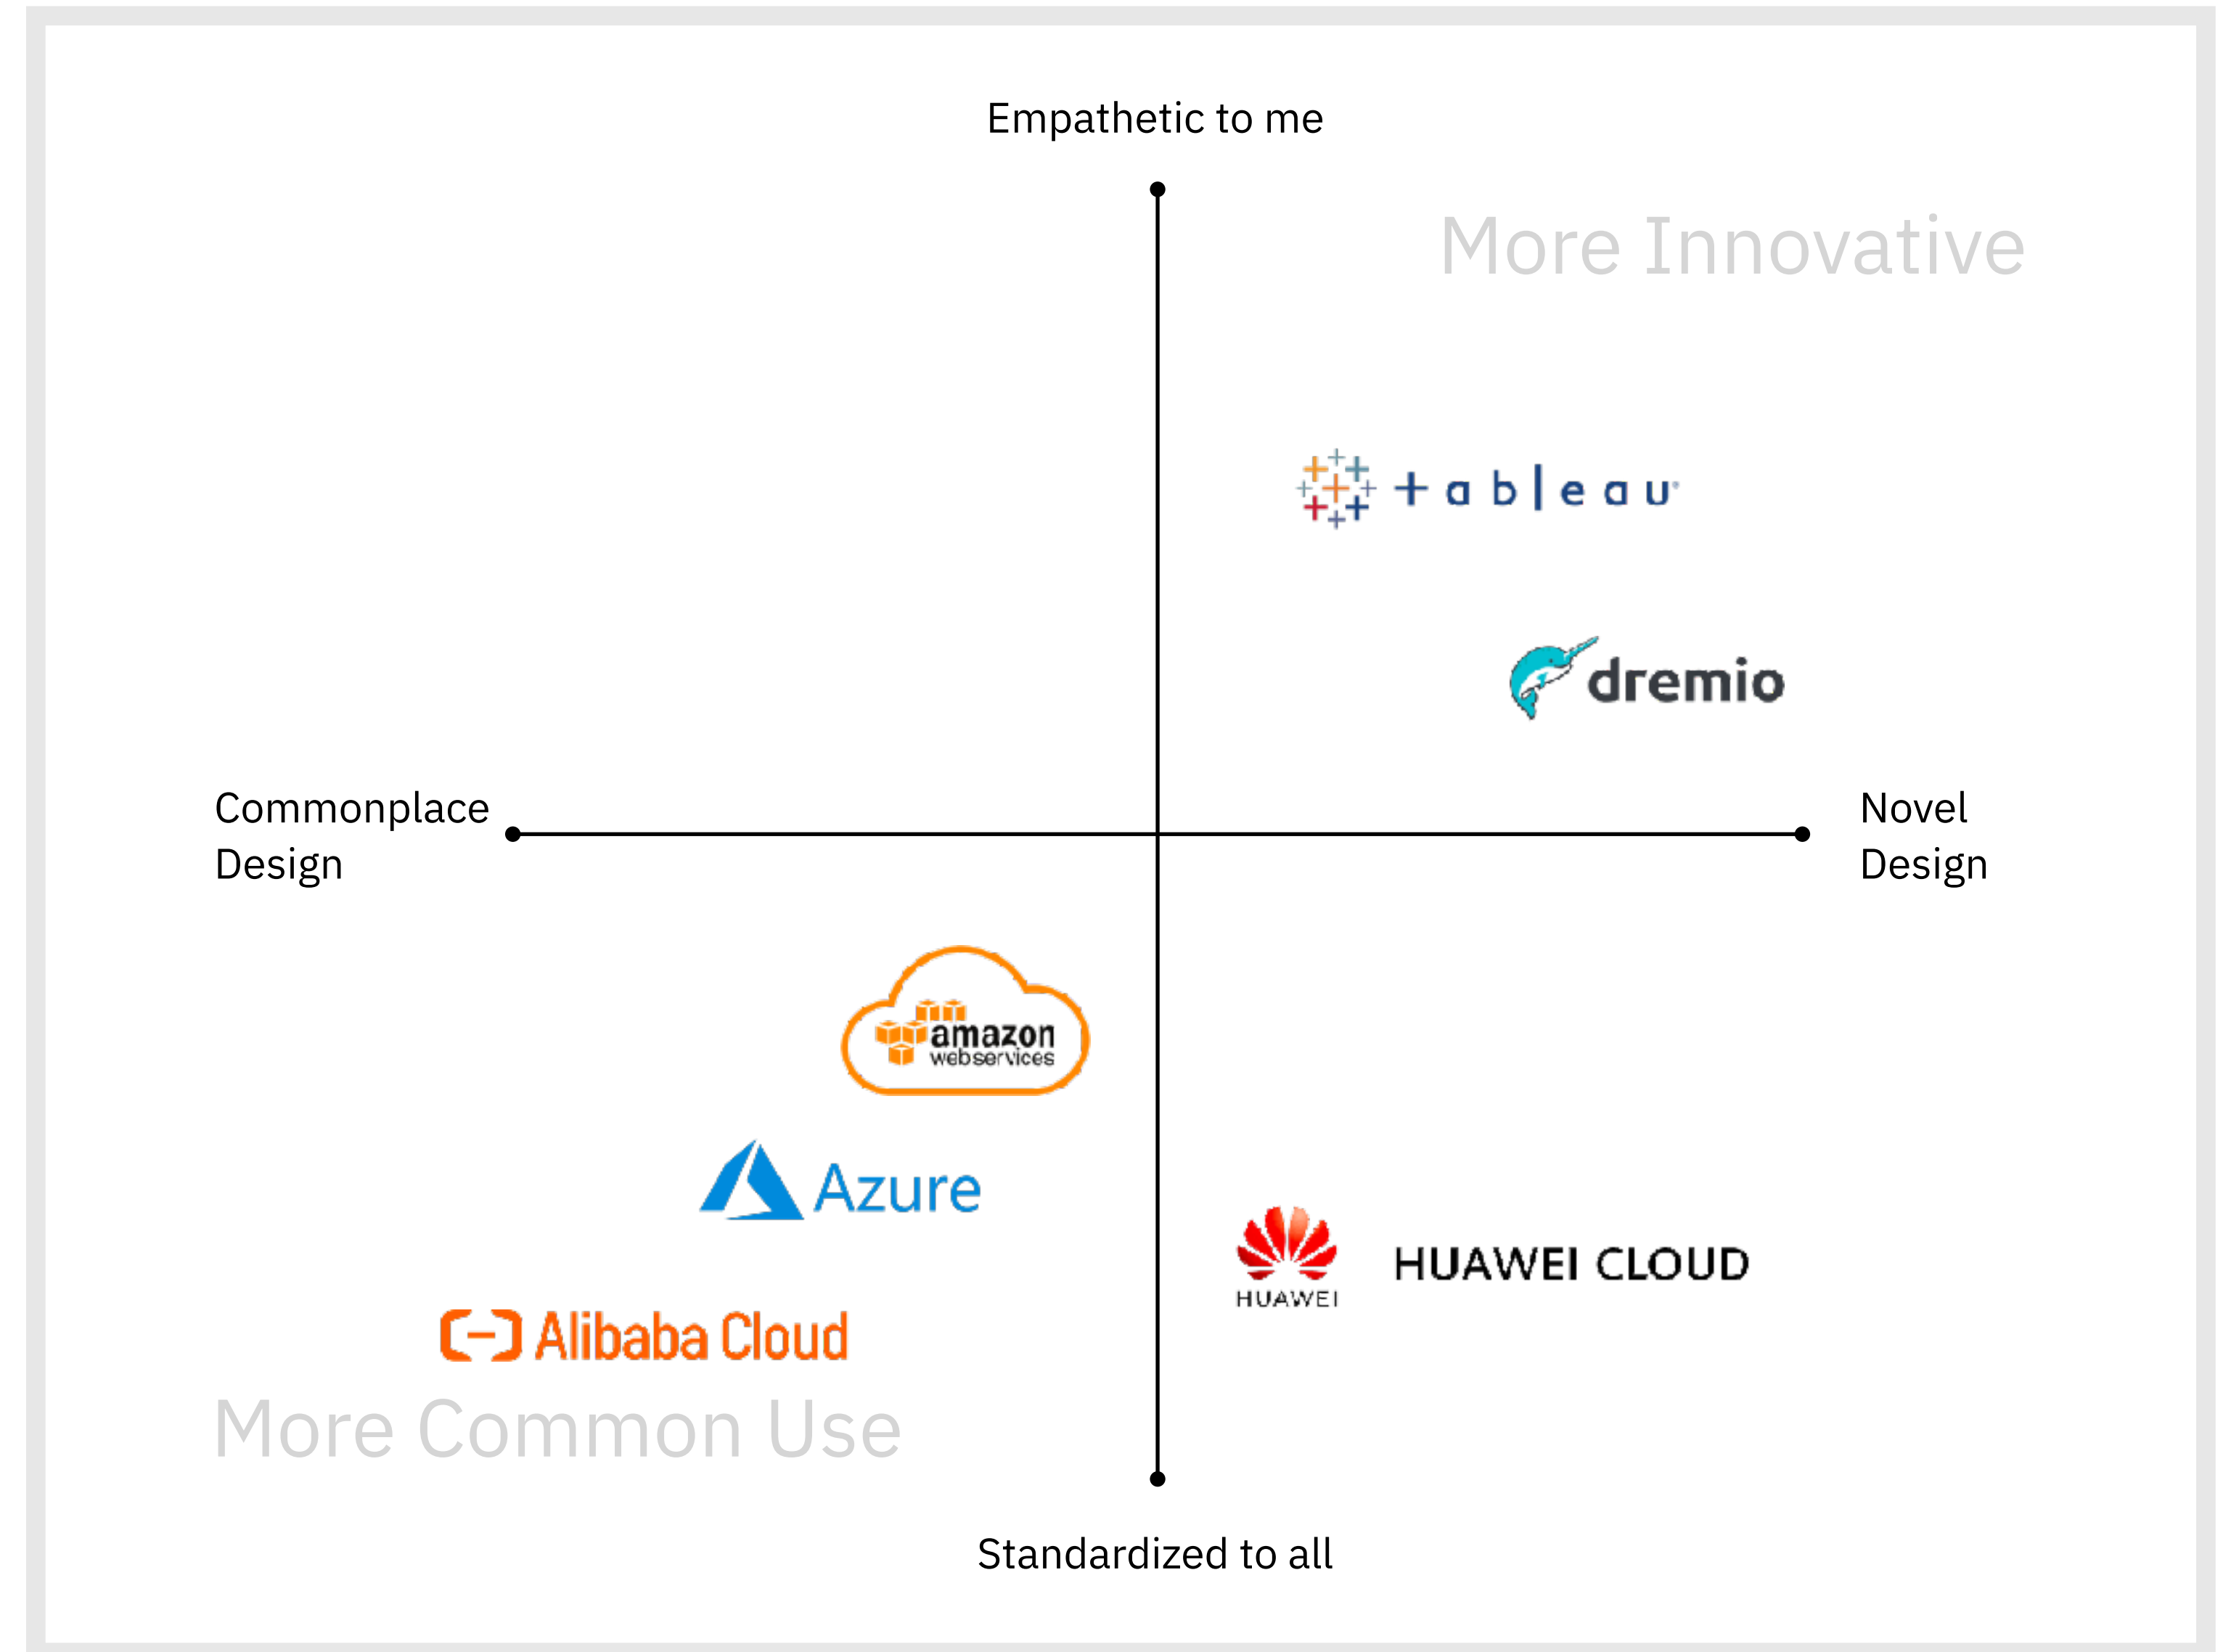

RESEARCH: COMPETITIVE ANALYSIS

Analyze B2B Competitors

To identify strategic design opportunities, our team conducted the competitors' analysis. We've identified four major competitors who had strong design languages and focussed on identifying their strengths and weaknesses.

This process helped us to identify the opportunities for our language of big data industry:

- **Scalable Design Language**
The language should scale across devices and across third-party developer apps as well.
- **Unique Design DNA**
The language should be unique and distinct from the major competitors.
- **Be Bold Yet Timeless**
The language should be long-lasting.

RESEARCH: UI AUDIT OF COMPETITIVE ANALYSIS

	Consistency	Data Visualization	Animation	Completeness	Innovation
	★ ★ ★	★ ★ ★ ★ ★	★ ★ ★ ★	★ ★ ★ ★	★ ★ ★ ★ ★

	★ ★ ★	★ ★	★ ★	★ ★ ★ ★	★ ★

There were about 20 participants with high standard to vote,

The UI Audit

To achieve consistency was one of the goals of creating a shared design language. It’s essential to standardize the visual design. That’s why even before starting work on a visual language, we decided to conduct a UI audit. Our goal was to understand the anatomy of the web UI kits.

We broke down the whole web into atomic elements—colors, shapes, shadows, lines, transitions. By decomposing the design, our team was able to see how individual pieces work together and form a greater whole. At the end of UI audit, we had all the elements that make up the digital product (buttons, navigation bars, icons, etc.) grouped into distinct categories.

		
First Impression	Complex	Clean
Convey Clear Message	Not often	Clear instructions for next step
Efficient Navigation	Yes	Yes
Organizational Clarity	Yes	Yes
Clear Labeling	Yes	No
Consistent Design	No	Yes
Matching User Expectations	Yes	No
Have Visible Status	No	Yes
Supporting Readability & Scannability	Yes	Not often
Facilitating User Tasks	No	Yes
Be Quickly & Easily Accessible	Yes	No
Providing Help	No	No
	Yes	Not often

RESULT OF RESEARCH

Stable

Build a stable system user interface, so that users can trust our product at first impression, believe that the system has a high standard of stability to help them to complete daily tasks.

Clear Theme

A clear and clean user interface without too much intrusive information and feedbacks that can help users focus on completing tasks and solving problems more efficiency

Facilitating User Tasks

Clear instructions can help users better complete multi-step tasks, and understand the meaning and function of each step.

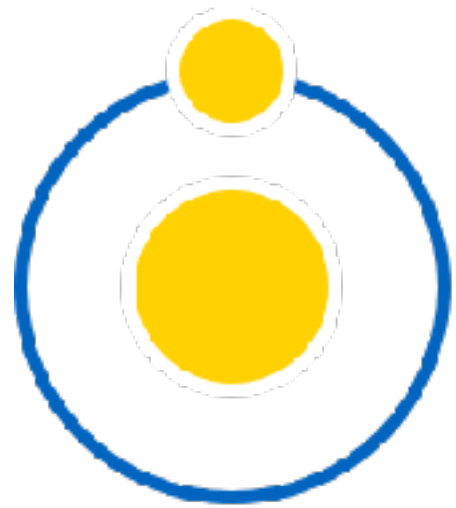

Effective Guidance

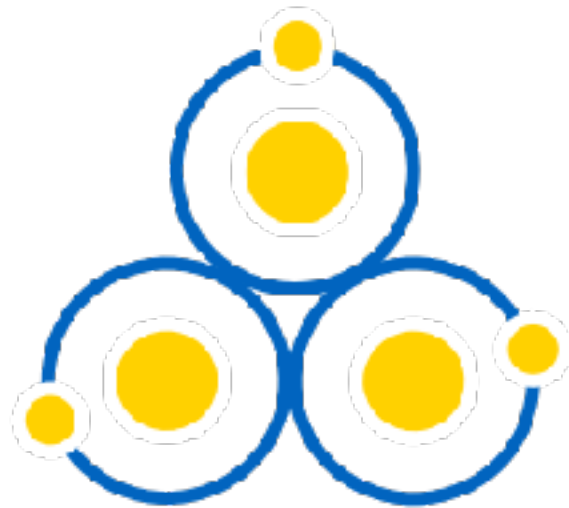

The design language should provides real-time and error-proofing fallbacks to prevent users from making unrecoverable errors.

DESIGN: APPLY ATOMIC THEORY

Atoms

Molecules

Organisms

Templates

Pages

Component Consistency

To design basic elements embedded brand spirit, like typeface, font size, color usage...etc. With these elements, we could composite the basic components.

Interaction Consistency

With these basic components that could help us to combine into pattern and maintain interaction consistency.

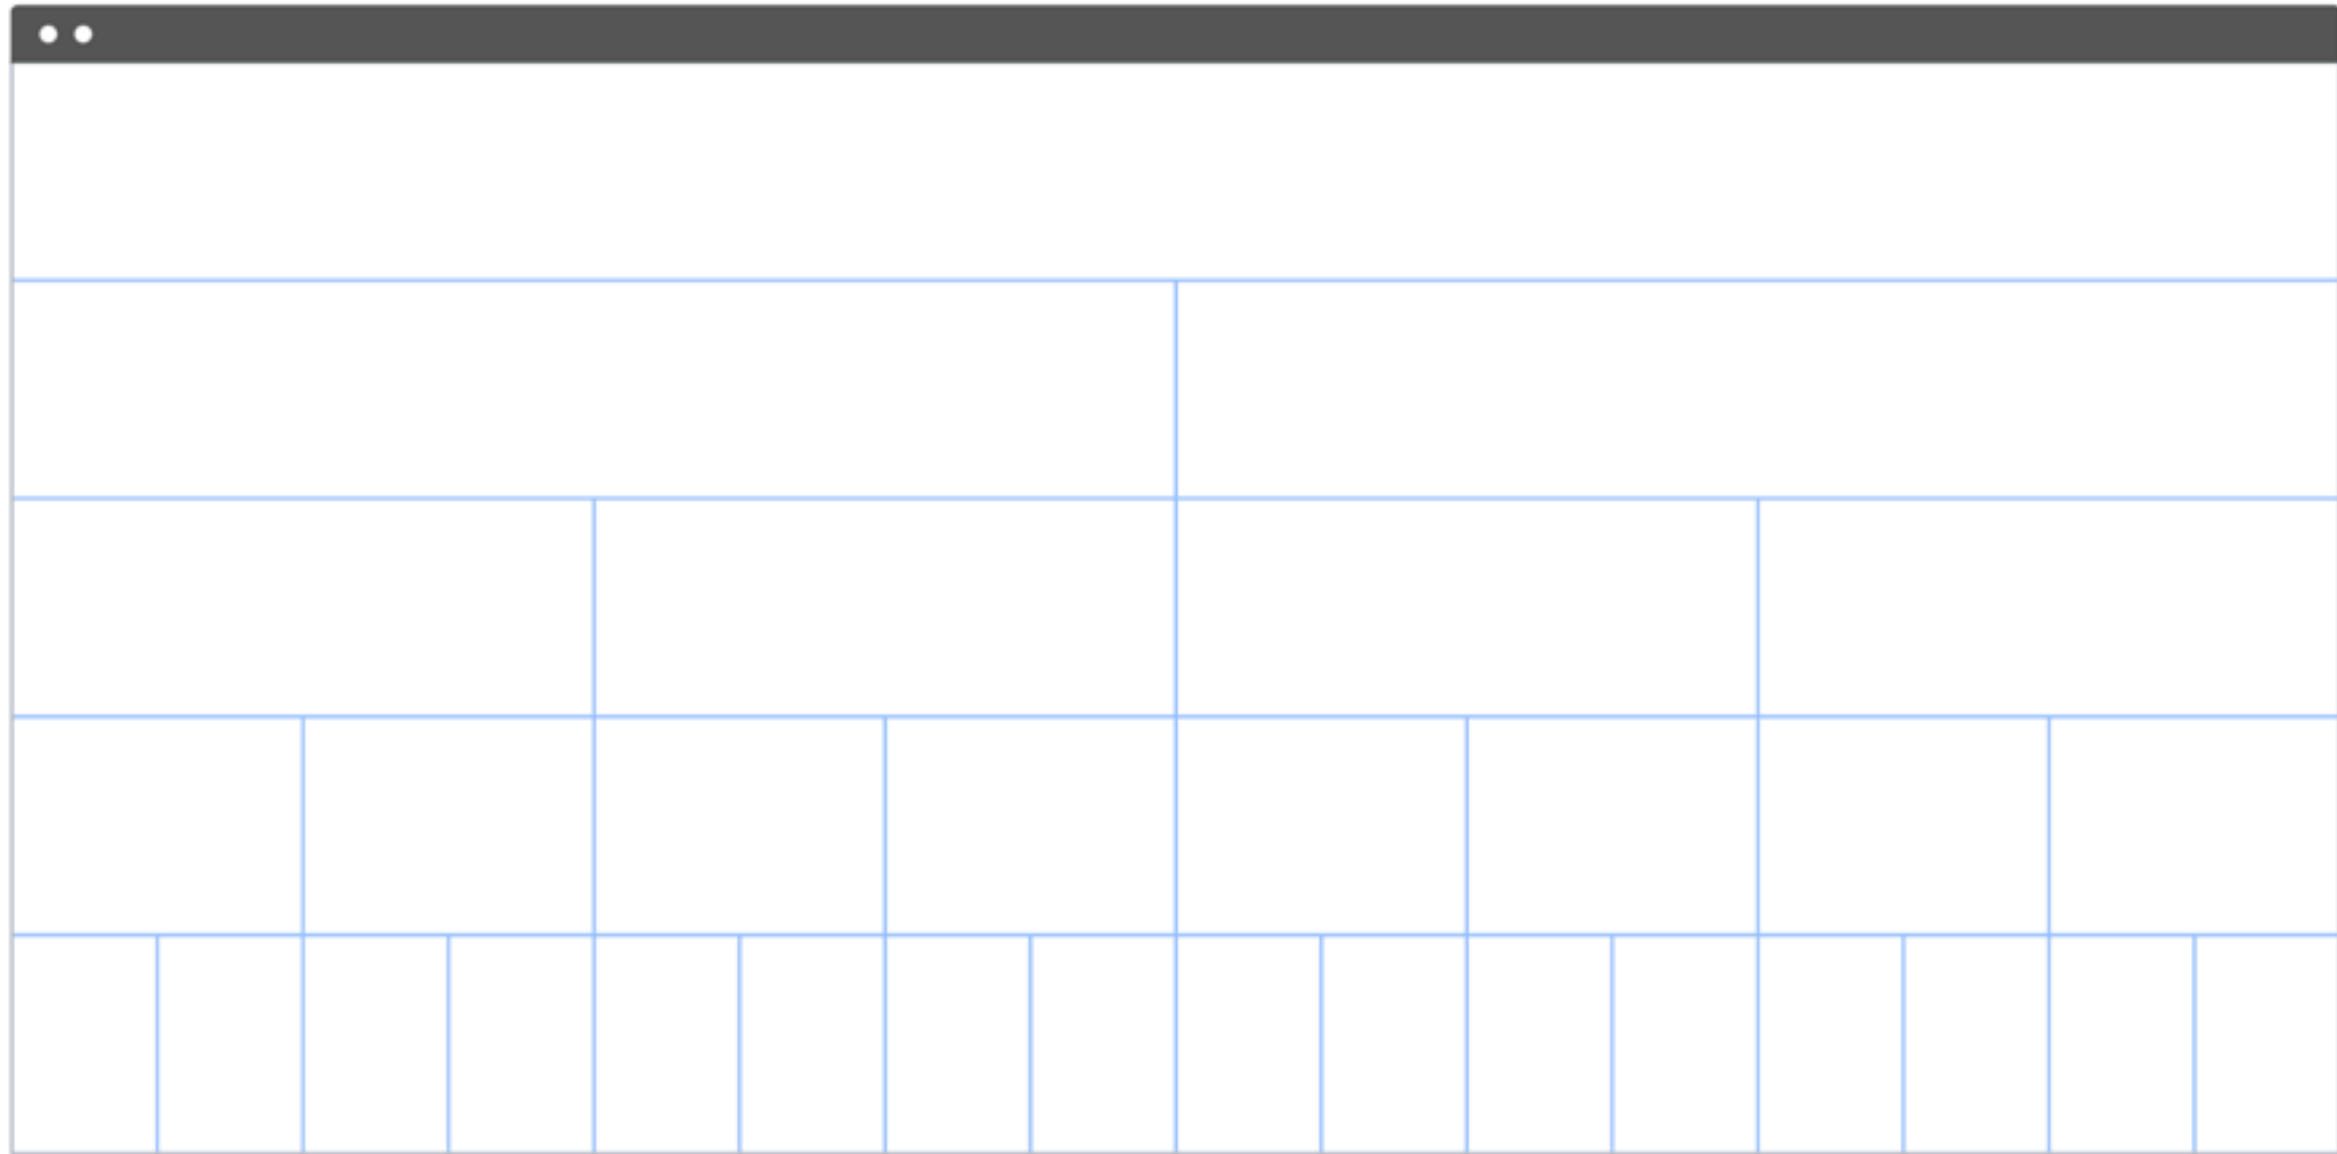

Behavior Consistency

From elements to patterns, we could create a new mental model for our uses.

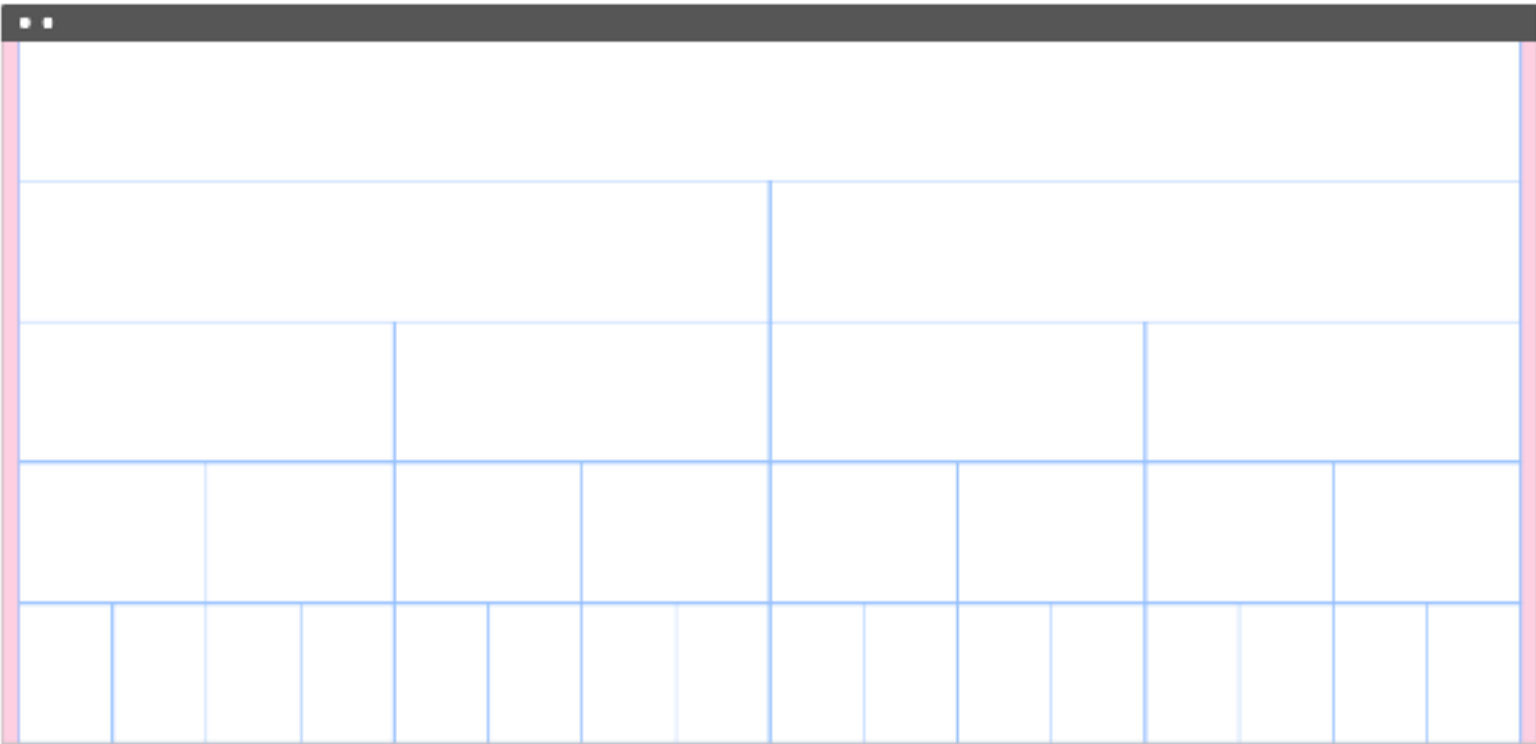

Columns and Rows

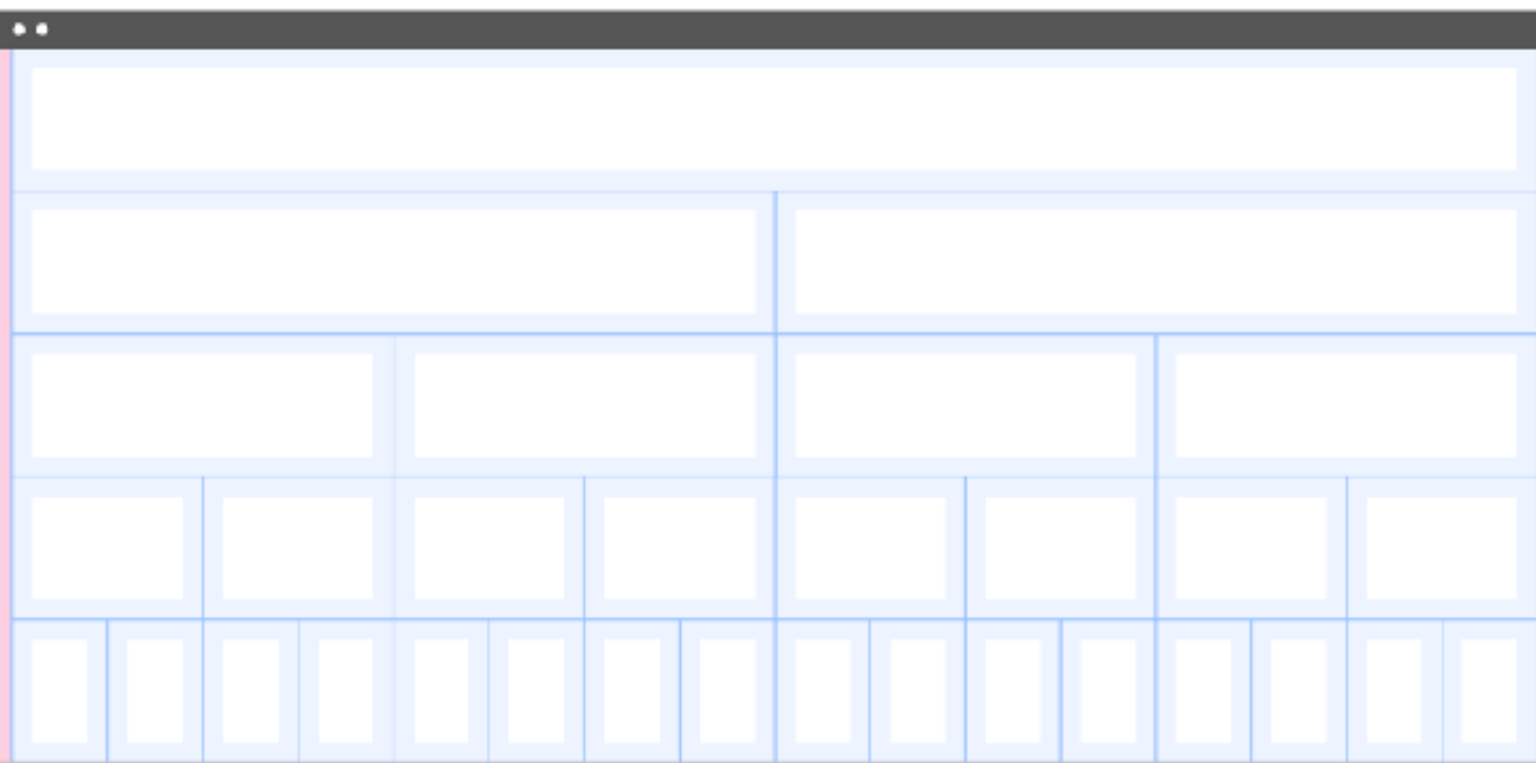

Columns and rows create key lines that are essential for visual rhythm, especially for typography. Construct columns by either dividing a space into a fluid grid, or by tiling fixed boxes in multiples.

Buttons

Labels

Inputs

Figure 1 displays a 6x6 grid of button variants, organized into two 3x3 sections. Each button contains a combination of text, icons, and actions. The top section shows combinations of 'Label Placeholder', 'Label Placeholder', 'Label Placeholder', 'Label Placeholder', 'Label Placeholder', and 'Label Placeholder' with 'Action'. The bottom section shows combinations of 'Label Placeholder', 'Label Placeholder', 'Label Placeholder', 'Label Placeholder', 'Label Placeholder', and 'Label Placeholder' with 'Action'. The grid includes various combinations of text, icons, and actions, with some cells highlighted in red, green, or grey.
