Dear Sir/ Madam,

As a UX/UI designer who more like problem solver via design thinking methodology. Expertise in enterprise software design with conceptual solutions, also an active, responsible and creative designer, good at collaborating with multi-disciplinary teams to output solutions.

I'm ability to work under pressure, manage client expectations effectively, energized by complex problem solving and push the innovation on strategic solutions. Have good leadership for talent training, planning the short, medium and long-term goals for the team.

My Strengths :

Design Management

As a design lead, efficiently manage resources, schedules, process and priority of the design activities for several simultaneous features and initiatives. Lead UED team, be responsible for maintaining good morale and ensuring the professional growth of the team.

Design Strategy

Set design strategy and principles to guide design work for new projects based on a deep understanding of user needs, business goals and technical limitations. Work at the early concept phase by facilitating ideation sessions, storyboarding, brainstorming, creating user scenarios, and sketching early stage mockups.

UX/ UI Design

Produce design briefs, information architecture diagrams, wireframes, interaction flows, low-fi prototypes and hi-fi design to develop and evolve user experience designs. Implement the appropriate visual design language (including grid, typography, color and other design-language patterns) for the products and deliver visual assets (icons, logos, layout redlines, screen mockups, hi-fi prototypes) to engineer team on time with high quality, in accordance with agile methodology.

Communication/ Cooperation

Effectively communicate design strategies, concepts and solutions to peers, partners and stakeholders throughout the organization. Work with product managers to collect user feedback and trans concept into design solutions.

Agile Method Practice

Practice a highly efficient, iterative design process with light documentation. Lead breaking down task items to workable sub-task items properly. Contribute to sharing of Agile adoption through trainings and workshops about Agile principles, Scrum, Compliance, Product Delivery.

Design Thinking

Responsible for helping teams challenge assumptions, discover actionable insights, and arrive at innovative outcomes. Facilitating meeting where multi-disciplinary teams plan and prototype user-centered designs. Selecting the right design thinking steps and activities gets easier with experience.

EDUCATION

2013 -2015

Master in Industry Design (HCI)

National Taiwan University of Science and Technology

1999 -2003

Bachelors of Commercial Design

Ming Chuan University

EXPERIENCES

2022.08 - 2024.04

Zixel

Sr. UX/UI Designer/ Manager

- 3D CAD Cloud Platform (0-1): Spearheaded the UX/UI and interaction design for a domestic cloud-based 3D CAD software; established enterprise design systems and managed full-cycle product development from concept to launch.
- Innovation Projects (AR/VR): Led design for AR and virtual reality initiatives; managed project lifecycles, stakeholder engagement, and delivered high-impact immersive experiences.
- UED Team Leadership: Directed the UED team's professional growth and methodology; implemented data-driven research and experience quantification to optimize product architecture and usability.

2019.12 - 2022.08

IBM

Sr. UX/UI Design Consultant

- Exploring innovative opportunity with client via design thinking workshop. Illustrating and designing ideas using storyboards, process flows, service blueprints and customer journey and sitemaps.
- To create rapid, iterative, and low-fi prototypes. Design high-hi user interface for platforms, provide strategic solution and co-work with stakeholder to implement MVP iteration.
- Schedule and facilitate the SCRUM Meetings with daily standup meetings, sprint planning, sprint review meeting and retrospective.

2017.10 - 2019.07

Kylignece

Sr. UED Manager

- Design UI/UX and design guideline of big data acceleration, cloud management and devops management platform, responsible for zero to one new product development.
- Head of the company's official website, responsible SEO strategy, content, framework planning and vendor management.
- Provide leadership, direction, and mentorship for a team of UX designers, lead UED team to implement user research, including expert consultancy, user interview and questionnaire interviews.

2015.09 - 2017.10

Linkedcare

Sr. UED Manager

- Lead UED team, including coaching, team-building, conflict resolution and optimize workflow for UED team.
- Design UI/UX of dental clinic management and cosmetic medicine SAAS platform, responsible for zero to one new product development.
- Conducting usability testing to iteratively validate and improve user journey to deliver best experiences for our users, via user interview, design thinking workshop, user testing and design guideline for SAAS platform.
- Define product branding strategy and corporate identity system.

2012.11 - 2015.06

Mozilla Taiwan

Sr. UX/UI Designer

- Design and maintenance of Firefox news portal site and event websites.
- Localized Firefox browser with improvement NPS in Taiwan.
- Design new UI of Firefox mobile/TV OS.

2009.10 - 2012.10

Bobii Creative

Sr. Web Designer

- Create concepts, wireframes, and mockups and propose the creative solution of official web site and APP to our clients.
- Strategically create new features and functionality based on user needs and feedbacks.
- Closely co-work with engineer and html & CSS front-end coding.

2005.04 - 2009.09

USee Advertising

Graphic Designer

- Leading branding and CIS design system, include key visual design, visual spec defined, official website and business forum exhibition.
- Responsible for designing monthly magazine and advertisements for the hi-tech industry.
- Responsible for graphic proposal and communicate requirements with customers.

PROJECTS

Healthcare of Elderly Ecosystem

Role : Workshop Facilitated, App & Web UX/UI Design, Project Management

- Facilitate or guide participants through a process of co-creation and active dialogue to discover business direction and elder needs.
- Design MVP iteration products which provided healthcare solution for the elderly ecosystem.
- Collaborate with product managers, marketing and R&D to translate user needs into physical and/or digital assets that are built upon best in class usability guidelines and brand considerations.

Key Indicators :

APP user growth 5% increased

Healthcare service satisfaction 12% increased (SPSSAU KANO: Significance)

HCI Improvement of CDSS Platform

Role : Team Lead, Web UX/UI Design, Product Management

- Closely collaborate with DS to integrate intelligent voice assistant and digital therapeutics (DTx) technology in CDSS platform.
- Adopt interactive principles and theories to improve the usability of CDSS, conducting user research to influence the interaction of diagnosis.

Key Indicators :

Paper published in International Journal of Medical Informatics, Chinese Journal of Medical library & Information Science.

Electric Industry Digital Transformation

Role : Workshop Facilitated, Web UX/UI Design, Project Management

- Facilitate framing & DTW workshop to discover workflow and pain points from participants. Draw a user journey map, persona, empathy map and ideation map.
- Lead the project to design user story for data production platform, include apply agile development and scrum methodology.
- Partner with cross-functional colleagues and clients to design and prepare user testing and knowledge transfer training. Responsible for system launch and training in production line.

Key Indicators :

Deployed on 10 extensional production lines.

New tech such as iot, edge computing and 5G are embedded.

Big Data Acceleration/ Cloud Deployment Platform

Role : Web UX/UI Design, User Experience Design, User Research, User Testing

- Redefine both of design language(system) and data graphics, combined with new branding, applied on new generation product.
- Lead and conduct a variety of user research activities, including surveys, competitive/observation research, field research, co-creation, questionnaires, usability testing (remote and in-person).

Key Indicators :

Improve user task completion rate 22%

Average task completion time 15% reduced

NPS 15% increased

Dental Clinic SAAS Platform

Role : App & Web UX/UI Design, User Experience Design, User Research

- Manage the end-to-end design process to produce solutions that positively impact the experience of dental patients, while balancing clinical and business needs.
- Figure out functions and workflow for each character/phrase, design long-term UCD plan and usability testing to improve user flow and solve pain points.
- Guide product development and engineering through the use of concept sketches, user flows, mock-ups, and high-fidelity prototypes.
- Responsible for ios, Android and web UX/UI design.

Key Indicators :

SUS(System Usability Scale) Grades 12.5% increased

Time of Usage (Each Login) 13% increased

Time of Task Testing 28.3% reduced

Customer Attrition Rate 10% reduced

Interviewed over 20 dental clinics and over 50 users
